EDUCATION

2020-2024

TECHNICAL UNIVERSITY

SOFIA

- Bachelor in computer and software engineering

2015-2020

**VOCATIONAL SCHOOL OF
COMPUTER TECHNOLOGY,
PRAVETS**

SKILLS

Backend:

- Java (Spring Boot, Spring Cloud)
- Rust (Tauri)

Frontend:

- HTML
- CSS

Database:

- SQL

Tools:

- Git
- Docker

LANGUAGES

- English (Fluent)
- Spanish (Basics)

ABOUT ME

Computer and Software engineering graduate with strong foundation in Java, Rust and software architecture. Currently pursuing a Master's degree while seeking to contribute to a collaborative team where I can grow, learn, and help build scalable and impactful applications. Always curious and ready to tackle new challenges.

COMPLETED COURSES

- Master Microservices with Spring Boot and Spring Cloud, (Udemy) 2025

MY PROJECTS

Cassette

Using Tauri as a framework, I developed a desktop music player app that leverages Rust for the audio playback logic and uses web technologies for the user interface. [To Project](#)

Tech Stack: Rust, Tauri, Javascript, Html, CSS

Droplet

Developed an Android reminder app, that uses Java for the logic and the built-in Android xml capabilities for the interface. By storing and accessing user data in shared preferences, the app is able to calculate the optimal water intake for the day and spread the reminders evenly. [To Project](#)

Tech Stack: Android SDK, Xml, Java, Android Studio
